Leftovers are scraped off automatically at the end of the conveyor and collected into a removeable drawer.

Speed continuously adjustable by push buttons.

Equipped with 230 V outlets on each side for the use of other machines such as blenders.

The simple function of the Serving Conveyor

Our "Serving Conveyor" provides a stress free process of loading food onto driving past plates. The speed of the conveyor can be continuously adjusted by push buttons. The chefs stand next to the conveyor and prepare the plates, wich are being driven past on a food safe approved belt. If food or sauce spills onto the belt, the leftovers will be automatically scraped and collected into a removeable drawer at the end of the conveyor. The "Serving Conveyor" is equipped with 230 V outlets on each side for the use of other machines such as blenders
